TECH CENTER 1600/2900

Sir:

In response to the office action dated July, 1, 2003, Applicants elect, with traverse, the invention of Group I, process claims 1-11, for examination in this application. The traversal is on the basis that the claims of Groups I and II should be examined together.

The basis for the Examiner's restriction is that the compositions are independent since they are not disclosed as being capable of use together, they have different modes of operation, they have different functions and/or they have different effects. This statement is incorrect. The claims of group I and II are related in that they are product and product by process claims. In reviewing any art that is directed to the process of making such products, however, disclosures of the products themselves should also be disclosed. Thus, the claim groupings are sufficiently related so that it should not pose an additional burden on the Examiner to review the patentability of the product-by-process claims. Thus, claims 12-13 must be examined with product claims 1-11, so that claims 1-13 should be examined together at this time.

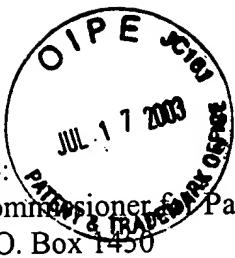

No fee is believed to be due for this response. Should any fees be required, please charge such fees to Winston & Strawn Deposit Account No. 501-814.

Respectfully submitted,

Allan A. Fanucci (Reg. No. 30,256)
